

INTER-OFFICE

Document No. 30

106009

TO Plainville

FROM Plainville

MR. J. S. Appleyard

DATE May 22, 1961

SUBJECT: VISIT - M. E. Hupfer - Water Resources Commission
Thursday, May 25 - Friday, May 26, 1961

Mr. M. E. Hupfer confirmed his visit this week to take samples of our waste treatment plant influent and effluent.

THURSDAY, May 25, 1961

Mr. Hupfer will be in at 9:00 AM for the sole purpose of picking up samples before treatment and to witness the treatment of a batch. At this time he will establish a time for the Friday, May 26 visit.

FRIDAY, May 26, 1961

Mr. Hupfer and any others he might arrange to bring, including Mr. Currie, Chief Engineer of the State Water Resources Commission, if the latter expresses a desire to accompany him. The purpose of this visit will be to collect samples of the treated effluent for analysis.

NOTE: The State does not intend to gather area samples for analysis at the time of these visits. The State has obtained spectrophotometry equipment but does not feel that they are sufficiently experienced in setting up and using it presently.

Mr. Hupfer stated that they have contacted a reliable outside source (Electric Boat Company, New London, Conn.) who are equipped to handle these analyses and have requested a quotation from them on conducting, analyzing and reporting for the State of Connecticut. If the Water Resources Commission approves the proposal the State will perhaps have someone from the Electric Boat Company Laboratory collect the area samples and conduct the analyses for A.B.S. evidence.
